

# Conserving Our Environment

**Objective:** By the end of the lesson, students will be able to understand the importance of conserving the environment and identify simple ways they can contribute to conservation efforts.

## Pre-Cap

1. Why do we need clean air to breathe?
2. Why are trees important for us and animals?
3. What happens if we don't take care of our environment?

## **What is Conserving?**

Conservation means taking care of and protecting the environment.

## **How Do You Conserve the Environment?**

Turning off lights when leaving a room or not wasting water while brushing their teeth is a good way to conserve our environment

Can You Give More examples?

Conservation helps to keep the environment clean, healthy, and beautiful for everyone to enjoy.

## How can you conserve the environment

**Students Discuss about each actions and tell how do they improve our environment**
